The Problem

- Service based businesses face no-shows, last-minute cancellations.
- These issues lead to financial losses and inefficient resource use.
- Businesses suffer from inconsistent revenue streams and operational inefficiencies without effective management.

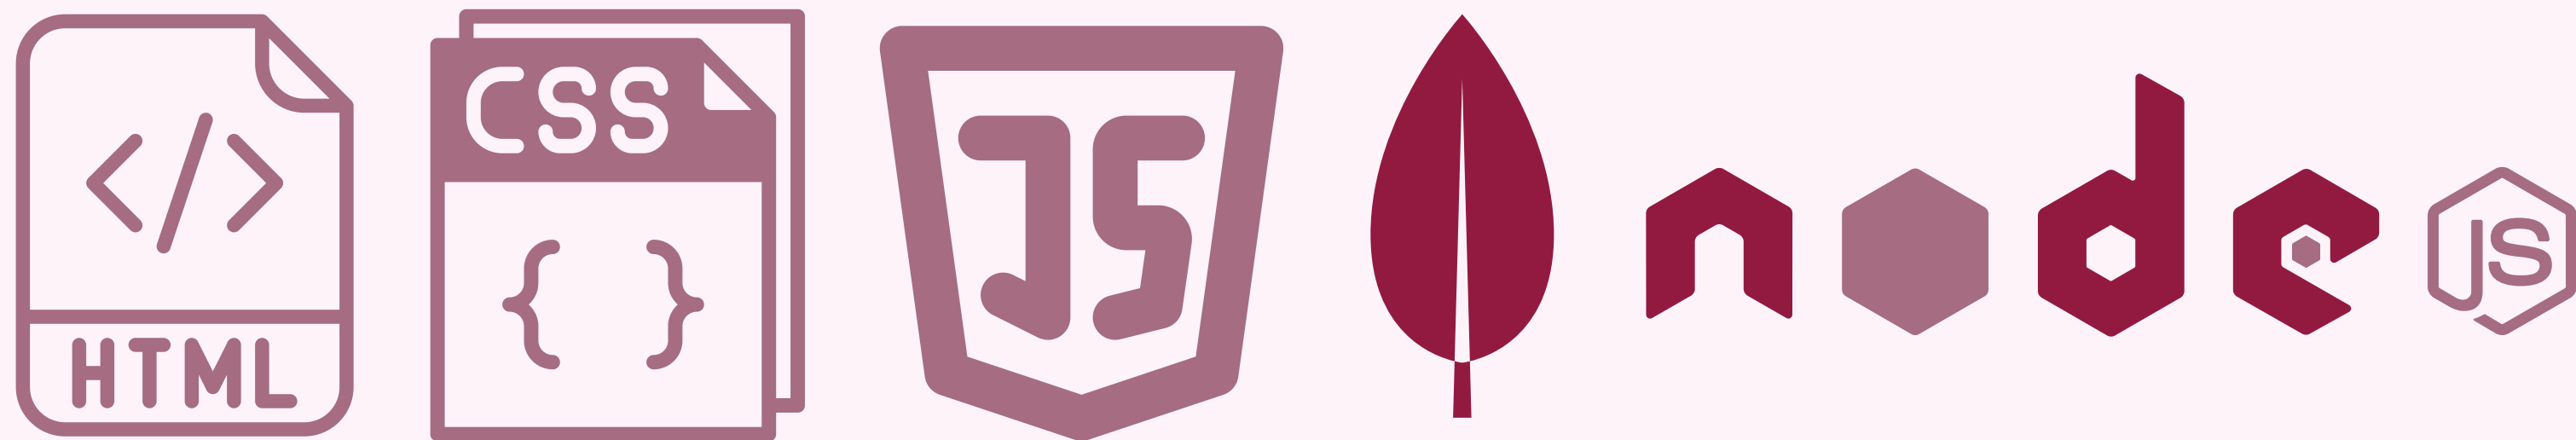

Our Solution

- Advance payments reduce no-shows and cancellations.
- Waiting list management fills canceled slots efficiently.
- Flexible tools stabilize revenue and improve operations.

NexTor Features

- **Advance Payment Handling:** Business owners require advance payment to confirm bookings, reducing last-minute cancellations.
- **Waiting List Management:** Businesses can manage cancellations and fill slots quickly.
- Appointment transfer options prevent revenue loss.
- **A-friend-brings-a-friend:** Helps attract more customers and grow the business.
- **Hot Appointments:** Price reduction for Unbooked Gaps.

Future Plans	Description	Benefit
AI Scheduling	Recommends optimal booking times.	Maximizes resource utilization and convenience.
Mobile App	Launches dedicated iOS and Android apps.	Enables on-the-go booking management.

Solution Description

- **Front-End:** HTML, CSS and JavaScript.
- **Back-End:** Node.js, Express.js.
- **Database:** MongoDB.
- Payment integration.
- Real-time booking availability.

Conclusion

NexTor solves key challenges for service-based businesses by simplifying appointment management and ensuring timely payments.
